Terry S Felton III

(504) 509 - 8620
terrysfelton@gmail.com

Known as Romme. Also known for completing given workloads in a quick and efficient manner under strict time constraints. Along with being highly motivated, I have over 3+ years of work experience within the tech field. In my free time I enjoy designing clothes, 3d printing, and gaming.

EXPERIENCE

Perficient (Charles Schwab) - Lafayette, LA — *Associate Technical Consultant / Full Stack Developer*

July 2024 - January 2025

- Led the development of key features in a modernization project, transitioning a legacy application into a scalable, high-performance Angular and .NET/C# solution.
- Played a critical role in front-end development with Angular to enhance user experience and ensure seamless functionality.
- Addressed accessibility requirements, ensuring JAWS compliance across various components.
- Created and integrated C# stored procedures to support data handling in DCURD, replacing the existing MongoDB setup.
- Developed components for user interface functionality, such as managing progress spinners, updating indicators , and adding floating scroll features for improved data table navigation.
- Performed detailed analysis and troubleshooting of issues such as page refresh states, channel code inconsistencies, and missing field integrations for wire acknowledgments.

Acadian Ambulance - Lafayette, LA — *Application Developer Intern*

November 2022 - July 2024

- A full-stack application developer position.
- Work closely with Blazor/Razor/ .NET Frameworks, React/Javascript/Typescript, and SQL
- Working with deployment pipelines such as TeamCity/OctopusDeploy
- Utilizing version control software such as Git/BitBucket/GitLab
- Developing on multiple, ongoing development projects.
- Collaborating with development team and other IT staff to set specifications for new applications
- Understanding client requirements and how they translate to new application features
- Writing high-quality code to program complete applications on schedule
